## Firms Shift Into Crisis Mode

Specialty contractors face similar market issues as GCs and design firms, but they also have to protect more field workers

■ 2019  
■ 2020  
(Measured in \$ millions)

In the midst of one of the strongest markets in memory, the COVID-19 pandemic hit the industry like a freight train, throwing firms into confusion. During the prolonged period of uncertainty, design firms, construction managers and many general contractors were left scrambling for answers on how to manage and market through the crisis. But for subcontractors and specialty trade contractors, the problem was more acute—their workers and field supervisors were on jobsites and had to be directly protected while trying to continue to work.

The scale of the market turnabout can be seen in the results of this year's ENR Top 600 Specialty Contractors list. As a group, the Top 600 generated revenue of \$151.27 billion in 2019, up 11.9% over \$135.20 billion in 2018. Revenue for the Top 600 had been experiencing double-digit growth for the past four years, and through the end of 2019 had risen 128.2% since the market recovery began in 2011. But the pandemic has brought that growth to a grinding halt and caused companies to wonder how to deal with the crisis.

Some specialty contractors had plans already in place to deal with the general situation. O'Connell Electric Co. began preparations in early February, before anyone had any solid understanding of COVID-19. "At that time, we dug out and dusted

**"In February, we dug out and dusted off our uniform Pandemic Response Plan, and began to update it with current names, locations and actions we would take in the event that there became a need."**

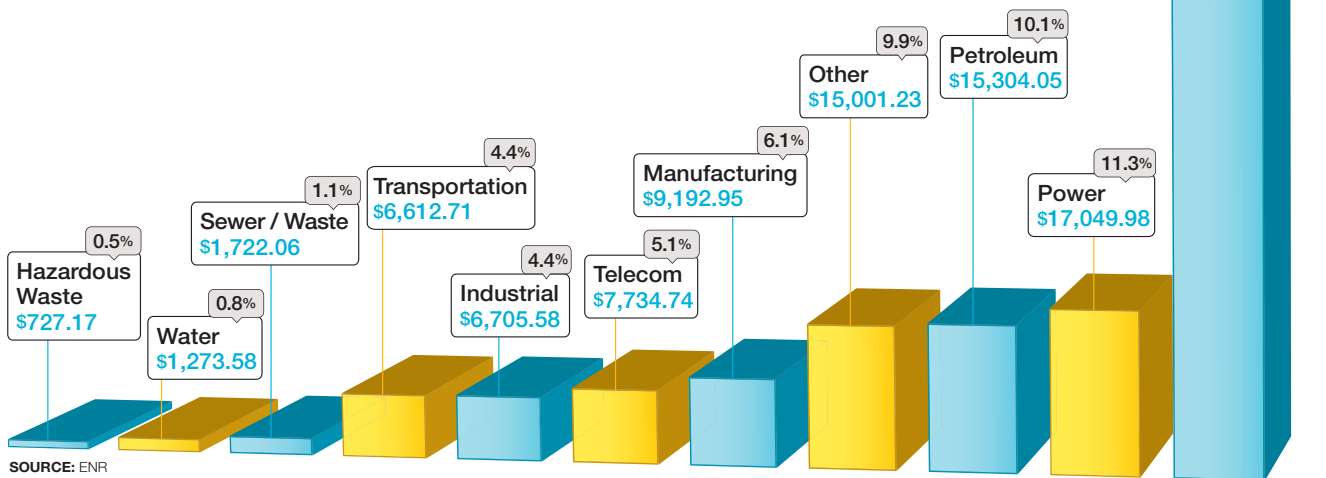

Victor E. Salerno, CEO, O'Connell Electric Co.

off our uniform Pandemic Response Plan, and began to update it with current names, locations and actions we would take in the event that there became a need," says Victor E. Salerno, CEO. He notes that the initial eight-page plan now has grown into a 69-page document that has become all-inclusive and dynamic.

Another firm that was quick off the mark was Menard Group USA. Owned by French contractor Vinci, it was receiving intelligence on the impact of the virus ahead of the directives in the U.S. "In mid-March we took an immediate stop on all of our active sites across the country for about two weeks to retool our field activities, procure PPE [personal protective equipment], train our site crews, write and issue new standard operating procedures and fully reinforce the behaviors necessary to protect field staff and their families," says Seth Pearlman, Menard's CEO. "This was a difficult and costly decision, and it was ultimately respected by the bulk of our staff and clients."

C3M Power Systems LLC also reacted quickly, taking multiple key team members out of operations to focus on COVID-19. "Although it was a sacrifice, we felt it was a necessity and their central effort benefited our entire team. They developed new processes, procedures, PPE and roles to keep our jobsites, of-

fices, and people working safely and efficientl ,” says Chuck Tomasco Jr., senior vice president.

### Taking Care of Employees

One of the first direct responses to the virus was protecting employees. Many firms initially saw a shortage of field personnel. “They were scared, they wanted to protect their families and themselves and they were receiving additional employment funds through the government,” says Ryan Denver, president of Select Demo Services LLC. Now that people are more educated on COVID-19 and understand the necessary steps to keep themselves and their families healthy, the workforce has come back in full force, he says.

Yet even now, craft labor is uneasy about going to jobs. “This is made worse for our traveling crews. Inconsistent policy in various jurisdictions compounds the challenges,” says Dave Crumrine, president of Interstates Inc. He says the firm has been able to work with core groups well to enable work to continue, thanks to “a ton of support work and communication.”

For many specialty contractors, existing safety programs and teams helped reassure workers at risk. For example, Limbach Holdings Inc. has extensive safety program teams that immediately mobilized to provide gaiters for all workers and institute daily temperature monitoring for people on site. “We had 30 people test-

## 551

Firms that had lower revenue in 2019 than in 2018

ing positive for COVID-19 and had 110 go into quarantine. But none of them got the virus on site,” says Charles A. Bacon, CEO.

Worker health has become a priority for specialty contractors like never before. This year “has certainly heightened our awareness of overall co-worker health,” says Brad Wucherpfennig, president of Baker Construction Enterprises. The firm quickly mobilized a COVID-19 leadership task force with representatives from all of its businesses. The cross-functional team allowed it to act quickly and make thorough decisions.

PPE to protect against transmission of the virus has become a priority. “Our company has spent around \$100,000 so far this year on additional PPE measures to make sure we are meeting customer requirements,” says Emanuel A. Paris IV, senior project manager at Alex E. Paris Contracting Co. Inc.

Crisis teams to react to potential virus cases have also become common. Harris created an incident response team with full authority to monitor daily cases and make changes to recommendations and requirements to act quickly and decisively. “This helped us keep the number of cases to 42 out of an employee base of 2,000,” says Michel Michno, Harris’ COO. He also notes that Harris has focused on COVID-related research and data and published white papers and videos that were used for training.

**Prefabrication**

# E-J Electric's Big Prefab Job

E-J Electric Installation Co. (No. 36) installs one of the last segments of the largest prefabricated traction power substation in the U.S. for Long Island Railroad's East Side Access Program. The building stretches 250 ft.

Many firms have instituted detailed guidelines to protect employees from exposure to airborne pathogens. McKinstry has created a set of rules and standards for employees returning to work in its offices. "Everyone must fill out a daily health questionnaire before coming in, face masks are mandatory, building capacity has been decreased to a maximum of 40%, travel is restricted to essential travel only, to name a few of our new guidelines," says Mark Jonson, vice president and general manager.

For some firms, prefabrication facilities have greatly helped to protect employees. "Our 30,000-sq-ft prefabrication facility allows us to limit the number of electricians on site. It also allows us to maximize our social distancing, all while maintaining the same levels of productivity," says Anthony E. Mann, CEO of E-J Electric Installation Co.

It's not just COVID that is causing firms to worry. "We also have placed a large focus on the mental health of our employees. The stress and pressure that exist now are far greater than before," says Keith Douglas, COO of Rosendin Electric. He notes that many employees work from home while taking care of their families, teaching their children and looking after their loved ones who may be considered high risk. Rosendin is trying to help them adjust.

Many firms also are working to help employees get

**"We had 30 people testing positive for COVID-19 and had 110 go into quarantine. But none of them got the virus on site."**

Charles A. Bacon, CEO, Limbach Holdings LLC

through the crisis financially, as well as in good health. HB Global LLC assisted employees by paying out their earned bonuses early, paying them sick time to get tested or stay home if they were exposed or a family member was ill, says Bob Whalen, CEO. "We gave everyone a health care holiday for four weeks. Today, the residual effect of these actions is that our leadership is even more aligned, we have an increase of trust with our employees and we continue to operate safely in a COVID environment and do it with excellence."

All these moves come with a cost. "We have seen a 7% to 10% productivity impact due to site access, distancing, tool cleaning and extra administrative processes," says Michno of Harris.

Jeff Marrs, CEO of ACCO Engineered Systems, says there has been a slight impact on productivity due to the added safety measures implemented at jobsites. "However, those are well worth it if we can keep our people and their families safe from contracting the virus," he adds.

## Staffing Up in a Down Market

Before COVID-19 hit, staffing was the top concern of specialty contractors. However, with so many projects canceled or deferred, many have resorted to layoffs and furloughs, easing the staffing concerns. In this year's survey, 62.5% said they were concerned about staffing projects, compared to 74.9% last year, the first time that percentage has had a major drop since 2011.

Many firms agree that staffing is not an immediate concern. "With higher unemployment, the quantity of available trade employees is not an issue; however, finding well-qualified workers is an ongoing challenge," says Michael Cannon, CEO of KHS&S Contractors-East Coast.

Many firms agree that staffing is not an immediate problem, but they are looking ahead. "We haven't seen a lot of people deciding not to come to work. Many are grateful to still have a job," says Ted Lynch, CEO of Southland Industries.

But, while many other firms with delayed or canceled projects are now laying off people, Southland continues to hire. "Now is the time to be opportunistic in recruiting people," Lynch says.

Most firms say that any easing of staff shortages will be a short-term situation. "Pre-COVID, our industry was struggling with leadership attrition. The effects of the pandemic have only amplified this," says Greg Gossett, CEO of ERMCO Inc.

Gossett notes that, in this time of uncertainty, quality people are not interested in making career changes. "For organizations that are in a state of growth, this is making it difficult to secure the human capital needed

# The Top 600 Dialogue

How is your company dealing with staffing issues, and has the COVID-19 pandemic changed things?

**DAVE CRUMRINE, PRESIDENT**  
**INTERSTATES INC.**  
Sioux Center, Iowa

We are extremely grateful how our craft employees have hung in there with the PPE and protocol changes as well as the travel challenges. There are a lot of unsung heroes out there.

Do you see any techniques or technologies that are improving productivity?

**RYAN DENVER, PRESIDENT**  
**SELECT DEMO SERVICES LLC**  
Salem, N.H.

We are utilizing Meridian Pedestal Temperature Screening Equipment. They eliminate human error, do not need to be manned [and] have built-in facial recognition programming.

**WES MCCLURE, CEO**  
**WILSON ELECTRIC**  
Tempe, Ariz.

We have found the manpower market to have increased in quality from some smaller companies that were hit hard by the pandemic. We have made a concerted effort to continue hiring through the pandemic.

**DAVID LYON, VP OPERATIONS**  
**MCKAMISH INC.**  
Pittsburgh

Virtual meeting software is a technology that we rarely utilized before COVID. Using it over the last six months has been a real-eye opener to the benefits of efficiency and productivity it brings.

**CHUCK TOMASCO, SVP**  
**C3M POWER SYSTEMS**  
Capitol Heights, Md.

There are good people out there looking for jobs, better people than we've seen in five-plus years, as COVID-19 has led to layoffs. We see it as an opportunity to invest in strengthening our team.

**JAMES POTTS, SVP OPERATIONS**  
**ERMCO INC.**  
Indianapolis

BIM/VDC on our projects is continuing to drive improvements in accuracy, efficiency and the use of prefabrication. This has led to more modularization and use of multi-trade prefabrication.

**JACK OLNSTEAD, PRES.**  
**TRI-CITY ELECTRICAL**  
Altamonte Springs, Fla.

We recently completed the process of going to 100% Employee Stock Ownership Plan from our previous of 45%. We feel this will have major impacts on our retention and recruiting process.

**EMANUEL A. PARIS IV, SR. PM**  
**ALEX E. PARIS CONTRACTING CO.**  
Atlasburg, Pa.

We decided to install GPS tracking units on all of our pickups and some small equipment. It gives us the opportunity to track [where our employees are], fuel usage, idle time and speed monitoring.

**BOB WHALEN, CEO**  
**HB GLOBAL LLC**  
Harrisburg, Pa.

What makes us attractive is that we are an employee-owned company (ESOP) focused on our people and our culture. We are not in the acquisition market to buy, cut, sell and get out, which inevitably leaves a trail of hurt and ruin.

**MATTHEW ENGLERT, COO**  
**ROSENDIN ELECTRIC**  
San Jose, Calif.

Jobsite contact and proximity tracing technologies are helping us manage COVID-19 and giving our management teams useful tools to ensure the safety of our employees.

**Indoor Air Quality**

# HVAC Firms Tackle COVID-19

The COVID-19 crisis has building owners and managers scrambling to keep their tenants safe from indoor pathogens. This has led to a tidal wave of inquiries to HVAC contractors on what they can do to protect clients' facilities. It is also putting pressure on contractors to come up with the best solution for each case.

"We are having this discussion with almost every existing client, as well as new ones," says Adam Gloss, director and general manager for the service group at McKinstry (**No. 33**). These discussions range from simple things like requests to upgrade filters to questions about ultraviolet or bipolar ionization technologies and everything in between. He says each facility's HVAC system has to be evaluated to determine the best solution for the client and its budget.

Many options include increased or better filtration, or the addition of more outside air into a building. "Often additional outside air can initially be introduced without significant capital investment, although energy costs should be evaluated," says David Leathers, executive vice president at Limbach Holdings Co. (**No. 44**).

Limbach also has produced negative air machines or air scrubbers to filter air in defined spaces, as well

as utilizing readily available off-the-shelf products, Leathers says.

Many contractors have done studies of the alternatives. For example, Hermanson Co. LLP (**No. 147**) began researching COVID-19 mitigation technologies as early as mid-March 2020. It "determined the combination of HVAC-based needlepoint bipolarity ionization (NPBI) and increased filtration to be the most effective option available," says Jacob Besagno, principal. He says Hermanson already has installed functioning NPBI systems in a large corporate complex, a school campus and a medical clinic.

RK Mechanical (**No. 95**) is another firm that has done its homework, reviewing alternative techniques. "In many cases, these solutions had side effects that could cause other issues or carry a high long-term maintenance cost," says Jeff Bushey, general manager of RK Service. RK settled on a few effective methods it feels confident will reduce virus spread, including NPBI (see photo above: an RK worker installs an NPBI device).

For new projects, indoor air quality considerations should be included in the design from the outset. "That is always the least expensive and most effective way to achieve the best results," Gloss advises. ■

to support the opportunity to grow. It also drives the importance of maintaining an excellent company culture to protect current team members from leaving."

## Market Plunge

COVID-19 has had a jarring impact on markets. Many firms saw their workloads drop dramatically and only now are beginning to see a recovery. "Job sites were shut down, some projects that were slated to start were canceled," says Len Monfredo, principal at E.M. Duggan Inc. "The economy slowly opened up and we were able to get most of our employees back to the job sites and the office. We lost a quarter of revenue due to the pandemic."

Many firms have similar stories. "In the midst of the COVID-19 crisis, near the end of May, 105 jobs totaling \$79 million across our five divisions had been canceled or delayed," says Whalen of HB Global. He is seeing some movement and recovery now, but the impact has been significant. "The entertainment and hospitality sectors have been hit especially hard."

Some firms working in the oil and gas market have suffered a "double whammy" when a dispute among oil producing countries in February led to a glut in oil on the market, plunging oil prices, followed by the pandemic, which resulted in a rapid decline in consumption, says John W. Zwack, vice president for business development and marketing for CIC Group, the parent company of Nooter and Wyatt.

Zwack says the outlook now for refinery work for Nooter will remain soft throughout 2021. Even many refinery turnarounds have been delayed. However, he says that Wyatt, CIC's nonunion industrial service group, has a more positive outlook. The firms now are looking at the renewable energy market, particularly wind power, to diversify.

Some contractors have felt less of the impact because of the markets they serve. "When COVID-19 hit in early March, we experienced some short-term shutdowns, but fortunately our work is mostly in open air and we were deemed essential, so our projects were able to proceed," says Rob Strobel, CEO of Lithko Contracting LLC.

Many companies serving a variety of markets have seen some positives mixed in with the general gloomy outlook. Bacon of Limbach notes that four out of eight of the firm's principal markets are "going gangbusters." He says the industrial market is strong, with manufacturers continuing to "on-shore" plants rather than build overseas, and the tech market and data centers are flourishing.

Limbach also has seen a surge in health care work. "Now that elective surgeries are being performed again, increasing health care companies' cash flows

hospitals are beginning to plan for new facilities. We have one healthcare customer that just announced plans to build 17 new facilities,” says Bacon.

Some customers are experiencing positive growth from the pandemic as consumer demand and spending has shifted. For example, “consumer goods manufacturers, including paper products, food and cleaning products are thriving, [and] e-commerce, home entertainment and home improvement also appear to be faring well,” says Timothy M. Dunlap, COO of CentiMark. “Conversely, our customers in hospitality and both office and retail commercial real estate are not as fortunate.”

### Diversity of Markets

A diverse market portfolio is seen as a key to staying financially healthy. While sectors like commercial office and hospitality have struggled, distribution and data centers have surged. The firms hardest hit have been those tied closely to a specific market. “We estimate that activity has been reduced by 60% or more,” because of its close ties to the oil and gas industry, says Jerrit Coward, CEO of Expanse Electric.

KHS&S had a big backlog of hospitality and amuse-

**“We also have placed a large focus on the mental health of our employees. The stress and pressure that exists now are far greater than before.”**

Keith Douglas,  
COO, Rosendin  
Electric

ment park work at the start of 2020. “A large portion of these projects has been postponed, suspended or scaled back, resulting in about a 25% reduction in our 2020 projections,” says Cannon.

The impact of the slowdowns has been inconsistent across regions, so a wider regional footprint has helped some firms. “The Bay Area has seen the most significant impact, with many projects coming to a halt or canceled,” says Douglas of Rosendin, but projects have largely continued outside of that area, he says.

Many firms now are moving into new markets, or expanding their presence in some of their current markets, to blunt the impact of the crisis. “With the changing availability of work in some markets, we have enhanced our resume in the data center, chip manufacturing and medical markets. We have extensive experience in each and believe those areas will expand over the next several years,” says Wes McClure, CEO of Wilson Electric.

Firms are not just looking to diversify the markets they operate in, but also their range of services. “Starting a Heavy Civil Demolition Division and bringing on a tenured heavy-civil team has allowed us to win

NA=NOT AVAILABLE. \*\*=NOT PREVIOUSLY RANKED.

and perform work that we would have never chased in the past,” explains Denver of Select Demo.

**Going Forward**

With the effects of the pandemic still raging, many firms are reporting market uncertainty both short and long term. “Do you have an end date for [COVID-19]?” asks Matthew Englert, co-COO at Rosendin Electric. “We really don’t know what projects will be canceled, delayed or fast-tracked six months from now.”

Crumrine of Interstates is also uncertain about the future. “We don’t believe there will be a clear end to the crisis,” he says, adding that many working assumptions will change permanently, so his firm is preparing employees and systems to be successful in a new environment, whatever may come.

Some firms fear that many effects of the pandemic may not be felt until 2021. “Most of [our clients] are taking some additional time to evaluate the long-term impacts of the market and where those funds are best allocated based off of current conditions,” says Tony Bond, president of BOND Civil & Utility Construction. He expects a market decline in 2021, as many of

**“Now is the time to be opportunistic in recruiting people.”**

Ted Lynch, CEO, Southland Industries

those customers are pushing work into 2022.

Anxiety heightened by uncertainty around the results of November’s presidential election is a major complication in assessing recovery “Customers seem to be deciding whether to release their budgets or not which is extremely dependent on the upcoming election and which candidate wins. The two candidates have very different approaches for their policies when it comes to energy and infrastructure in the U.S.,” says Paris of Alex E. Paris Contracting.

David Lyon, vice president at McKamish Inc., worries that the biggest impact on the workforce will be in 2021. “We were fortunate to keep most of our staff during the lockdown,” he says, but adds the firm may be unable to keep all field staff in early 2021, due to an anticipated slowdown.

Not everyone is seeing more darkness on the horizon, however. Some markets and regions have stayed strong during the pandemic, and that generated some optimism amongst firms. “For the Denver and Austin areas, I continue to see rising housing markets and a steady flow of incoming people, so it is a strange time,” reports Seth Anderson, CEO of Weifield Group Contracting. He sees a recovery in the first quarter of next year. “We feel the

market is going to recover fairly nicely after the crisis ends—so we are sharpening our saws and getting the team ready for the next wave.”

Many firms are preparing for the inevitable turnaround in the market, even though that is still sometime in the future. “We are insuring our financial and human resources are well positioned for a comeback by preserving capital, investing in team training and enhancing our Lean Construction processes,” says Cannon of KHS&S. “We are avoiding the narrow-minded view that everything will return as it was post COVID-19, and we are poised and eager to take advantage of new market opportunities.”

### On the Web

For expanded content on ENR's Top Lists, see [ENR.com/toplists](http://ENR.com/toplists).

### Companies

## Nooter Refreshes Its Brand

Few firms rose on the Top 600 list more than industrial service contractor Nooter (No. 38). But this rise was more a reflection of a corporate move than the market. In the past, Nooter's various subsidiaries, like Nooter Construction, Wyatt Field Service Co. RMF Nooter and AMEX Nooter, filed independently. But corporate parent CIC Group Inc. decided to regroup operations. Going forward, all union operations will be under the Nooter name and all nonunion operations will be under the name Wyatt (No. 158). “It’s not a rebranding, but more of a refreshing of our existing brands. We are updating all our branding,” says John W. Zwack, vice president for business development & marketing for CIC. ■

The industry has experienced downturns, even sudden ones, in the past. However, few have hit the industry as widely or as brutally as COVID-19. This has led some firms to be reflective

“When crisis hits an organization, the soul of your company is laid bare,” says Whalen of HB Global. “The COVID-19 pandemic has proven to be the ultimate test. Our people determine how well and how safely we serve businesses and our communities. Our employees continue to persevere through this bizarre situation.” ■

## How To Read the Tables

### KEY TO TYPE OF FIRM

**A**=asbestos abatement; **C**=concrete; **D**=demolition/wrecking; **E**=electrical; **F**=fire protection and sprinklers; **G**=glazing/curtain wall; **M**=mechanical; **MA**=masonry; **O**=other; **P**=painting; **R**=roofing; **SH**=sheet metal; **ST**=steel erection; **U**=utility; **W**=wall/ceiling; **X**=excavation/foundation.

**Companies** are ranked according to construction revenue in 2019 in (\$) millions from specialty contracting in a prime or subcontracting capacity. Firms

that were not ranked in 2018 are designated by double asterisks (\*\*). New contract awards refer to contracts awarded in 2019. NA=not available.

**General Building** as a category includes commercial buildings, offices stores, educational facilities, government buildings, hospitals, medical facilities, hotels, apartments, housing, etc.

**Hazardous Waste** includes chemical and nuclear waste treatment, asbestos and lead abatement, etc.

**Industrial Process** includes pulp and paper mills, steel mills, nonferrous metal refineries, pharmaceutical plants, chemical plants, food and other processing plants, etc.

**Manufacturing** includes auto, electronic assembly, textile plants, etc.

**Petroleum** includes refineries petrochemical plants, offshore facilities, pipelines, etc.

**Power** includes thermal and hydroelectric power plants, waste-to-energy plants, transmission lines, substations, cogeneration plants, etc.

**Sewerage / Solid Waste** includes

sanitary and storm sewers, treatment plants, pumping plants, incinerators, industrial waste facilities, etc.

**Telecommunications** includes transmission lines and cabling, towers and antennae, data centers, etc.

**Transportation** includes airports, bridges, roads, canals, locks, dredging, marine facilities, piers, railroads, pipelines, etc.

**Water Supply** includes dams, reservoirs, transmission pipelines, distribution mains, irrigation canals, desalination and potability treatment plants, pumping stations, etc.
